

OAK VIEW LANDSCAPES

About Oak View

Oak View Landscapes Limited was formed in 2004 by Paul Downer. Paul has over 20 years experience in landscape construction and project management, previously holding positions at senior management and director level. Paul's formal training was undertaken at Writtle College and the Institute of Directors. He is a former main Board Director of the British Association of Landscape Industries (BALI).

Based near Colchester in Essex we are a progressive company who work at the bespoke end of both the commercial and domestic markets, specialising in projects where there is close liaison with clients, Landscape Architects and Garden Designers. Oak View were double Award Winners at the BALI Landscape Awards in 2006.

We set great importance on staff training and development and aim to recruit experienced employees who have formal qualifications from land-based colleges. A comprehensive in-house training programme is supplemented by external courses to further develop staff as the company continues to grow and expand. All our staff hold appropriate certification for working on site and, as a company, we carry appropriate insurances.

Our fourfold promise to you:

- We'll design your garden from scratch or work in partnership with you and your designer to create a space which will give you great pleasure.
- We'll use trained people who will work safely, be supervised properly, and use the right equipment and materials for your project.
- We'll respect your time, your home, and your family. We'll turn up when we promise and if we're delayed by weather or unforeseen circumstances we'll keep you informed.
- We'll respect your budget and flag up any technical or other issues before they become potential problems.

A dream garden created by experts
